I would like to meet with you and Joe to discuss the reporting and to clarify why you ran these by 200.8 as originally requested. From the emails I saw today there seems to be a misunderstanding as to why this run was requested.

I need to leave in the afternoon for an hour but other than that I'm available. If you receive this email in time I'd like to meet at 9am.

Cindy, I have rerun the Dimock samples for Mn by 200.8. I have added the data to Element and created a new data package although I am not sure how to document this whole thing. The data is Peer Reviewed and I have put the package on your desk. Joe and I are both out tomorrow, but, if you have any questions you can call me on my cell phone. hopefully this will do it for mn.....?
robin.
